Good morning, Giuseppe.

THE PRESENT MOMENT

GIUSEPPE OS

● SYSTEM ONLINE

TODAY'S FOCUS

Pubblica un pensiero vero su LinkedIn

AWARENESS

Stai portando troppi fronti attivi contemporaneamente.

RECOMMENDED ACTION

Scrivi in 30 minuti una bozza su un problema reale che hai risolto questa settimana.

Take this step

It's not software that tells you what to do.

It's software that remembers who you chose to become.

PROJECTS

1

TODAY RITUAL / ACTION

UN PASSO ALLA VOLTA VERSO LA LIBERTÀ.

1

TODAY
Pubblicare un pensiero vero questa settimana

2

NEXT MOVE
Scrivi in 30 minuti una bozza su un problema reale che hai risolto questa settimana.

3

DECISION ENGINE
Chiedi al Board.

DECISIONE
Es. comprare casa, pubblicare un post, investire...

PERCHÉ LA VUOI FARE?

Motivo vero.

Chiedi al Board

*It's not software that tells you
what to do.*

*It's software that remembers
who you chose to become.*

*It's not software that tells you what to do.
It's software that remembers who you chose to become.*

Known Issues

- UI bypasses Executive Brain
- No cloud memory
- Reality Layer is stubs only
- Learning Engine is on-demand
- No authentication
- Board Engine not separated
- Purpose/Weekly engines are stubs
- README outdated

Future Improvements

- Route Today decision flow through ``POST /api/brain`` with ``intent: decide``
- Route Awareness and Potential panels through Brain API
- Remove direct client-side engine imports from ``app/page.tsx`` where possible
- Preserve existing UI behavior and test coverage
- Design memory schema with ``source``, ``updated_at``, ``confidence`` fields
- Migrate ``giuseppe_brain.json`` reads to Memory Engine slice API
