## Design Review

Version: 1.1.0

Date: 2026-07-03

Commit: 959b19b

Branch: main

Personal Intelligence Operating System

It's not software that tells you  
what to do.  
It's software that remembers  
who you chose to become.

Good morning, Giuseppe.  
**GIUSEPPE OS**

● SYSTEM ONLINE

TODAY'S FOCUS

**Pubblica un pensiero vero su LinkedIn**

AWARENESS

Stai portando troppi fronti attivi contemporaneamente.

RECOMMENDED ACTION

Scrivi in 30 minuti una bozza su un problema reale che hai risolto questa settimana.

[Take this step](#)

|                      |                         |                 |                 |

|----------------------|-------------------------|-----------------|-----------------|

It's not software that tells you what to do.  
It's software that remembers who you chose to become.

*It's not software that tells you  
what to do.*

*It's software that remembers  
who you chose to become.*

TODAY

# UN PASSO ALLA VOLTA VERSO LA LIBERTÀ.

TODAY

**Pubblicare un pensiero vero questa settimana**

NEXT MOVE

**Scrivi in 30 minuti una bozza su un problema reale che hai risolto questa settimana.**

DECISION ENGINE

**Chiedi al Board.**

DECISIONE

Es. comprare casa, pubblicare un post, investire...

PERCHÉ LA VUOI FARE?

Motivo vero.

**Chiedi al Board**

*It's not software that tells you what to do.*

*It's software that remembers who you chose to become.*

# Summary

## Playwright

- 40 passed

## Build

- PASS

## Typecheck

- PASS

## Deployment

- <https://giuseppe-os.vercel.app>

## Known Issues

- UI bypasses Executive Brain
- No cloud memory
- Reality Layer is stubs only
- Learning Engine is on-demand
- No authentication
- Board Engine not separated
- Purpose/Weekly engines are stubs
- README outdated

## Future Improvements

- Route Today decision flow through ``POST /api/brain`` with ``intent: decide``
- Route Awareness and Potential panels through Brain API
- Remove direct client-side engine imports from ``app/page.tsx`` where possible
- Preserve existing UI behavior and test coverage
- Design memory schema with ``source``, ``updated_at``, ``confidence`` fields
- Migrate ``giuseppe_brain.json`` reads to Memory Engine slice API
