DAILY COMPANION

IL MIGLIOR PASSO DI OGGI.

Good morning, Giuseppe.

TODAY'S FOCUS

Pubblica un pensiero vero su LinkedIn

WHY IT MATTERS

La reputazione stimata tra professionisti è la strategia corretta verso libertà 2036, non la fama generica.

RECOMMENDED ACTION

Scrivi in 30 minuti una bozza su un problema reale che hai risolto questa settimana.

Take this step

# Summary

## Playwright

- 40 passed

## Build

- PASS

## Typecheck

- PASS

## Deployment

- <https://giuseppe-os.vercel.app>

## Known Issues

- UI bypasses Executive Brain
- No cloud memory
- Reality Layer is stubs only
- Learning Engine is on-demand
- No authentication
- Board Engine not separated
- Purpose/Weekly engines are stubs
- README outdated

## Future Improvements

- Route Today decision flow through ``POST /api/brain`` with ``intent: decide``
- Route Awareness and Potential panels through Brain API
- Remove direct client-side engine imports from ``app/page.tsx`` where possible
- Preserve existing UI behavior and test coverage
- Design memory schema with ``source``, ``updated_at``, ``confidence`` fields
- Migrate ``giuseppe_brain.json`` reads to Memory Engine slice API
